With this set of financial ratios, Value Investor Professional provides a way for investors to start analyzing individual companies. All of the following ratios are customizable and can be applied to a company or companies. The ratios and their meanings are as follows: Cash: This ratio represents the amount of cash a company is currently holding divided by total stockholders' equity. This ratio measures how strong cash is relative to the shares of equity of a company. The higher this ratio, the healthier the company is. Assets to liabilities: This ratio represents a company's total assets as a percentage of its total liabilities. The higher this ratio, the better the quality of a company's financial statements. Net profit to income: The net profit to income ratio shows how much profit is generated per dollar of income. This ratio provides a way to compare companies' profit performance. A lower ratio would indicate that a company is generating less profit per dollar of income than companies with a higher ratio. Debt to capital: This ratio is the percentage of a company's total assets equal to its total debt. This ratio provides an indication of how leveraged a company is. A lower ratio indicates that a company is less leveraged. A higher ratio indicates that a company is more leveraged. Debt to equity: This ratio represents a company's total debt as a percentage of its total stockholders' equity. The higher this ratio, the more debt the company has relative to stockholders' equity. A lower ratio indicates that a company is more debt-free. Debt to total assets: This ratio is the percentage of a company's total debt as a percentage of its total assets. This ratio can provide a useful indication of a company's ability to pay its debts. A higher ratio indicates that a company is more capable of paying its debts. A lower ratio indicates that a company is not capable of paying its debts. Margin of safety: This ratio compares a company's operating profit with a company's total assets. The lower the ratio, the higher the risk the company's operating profit will fall. A higher ratio indicates a safer investment. Let's see how you can use Value Investor Professional to get a quick grasp of the financial performance of a company or group of companies. Assets: You can set this ratio to include the sum of cash, cash equivalents, and short-term investments. Assets: You can 1d6a3396d6
