Tanks Arena is still in development and playable solo versions of the game can not be expected. We use this Steam environment to get feedback from the player on new features and content. However, some strategy-battle issues have already occured. In particular, the game will switch to fullscreen when firing at long distances. This is prevented in the Steam version due to poor Steam display. Input on this issue are appreciated as the Steam release of Tanks Arena is imminent. PRERELEASE OF "Tanks Arena" Developer - The developer of the game is Mats Van Duinen, a former executive director and senior producer at Konami. His gaming career ranges from strategy gaming, to action, to puzzle games, and beyond. Gameplay Video TRIAL OF "Tanks Arena" Developer - Thanks to the Steam community and our supporters, we have almost exceeded our initial goal in the fund raising campaign. Although the resources are now exhausted the game should actually be completed this summer time. (Assuming we don't face any unforeseen hurdles along the way). Trailer Support -
