A semiconductor memory device, such as a static random access memory (SRAM) device, comprises a plurality of memory cells that are arranged in an array. The memory cells of the SRAM device are cross-coupled to form the memory cells of a bistable multivibrator (BMI) latch circuit. A latch node of the BMI latch circuit is coupled via a conductor to a latch sense node of the SRAM device. An "activated" latch signal is coupled to the latch sense node. The BMI latch circuit is set up to latch the value of the latch node when the latch signal is "activated". During a read operation, the BMI latch circuit responds to a read pulse by latching a latch node value in a first state (e.g., a first logic state) and releasing the latch node to a second state (e.g., a second logic state) if the latch signal is "activated". A "read pass-fail determination" of the SRAM device is based on whether or not the latched value is in the second logic state. That is, the SRAM device will pass the read operation if the latched value is in the second logic state and will fail the read operation if the latched value is in the first logic state. In the BMI latch circuit, when the latch signal is "activated", the latch node and the latch sense node are both precharged to the second logic state. Thereafter, the latch node undergoes a pre-charge operation in which the latched node is first discharged to the first logic state and subsequently recharged to the second logic state. The latched node subsequently undergoes a discharge operation in which the latched node is discharged to a latch signal (e.g., first logic state) voltage. In the BMI latch circuit, the discharge operation is performed by coupling the latched node to an external ground node. During the precharge operation, the

likely to be jerks in public, where they are visible to and have a real impact on everyone around them. Second, when we learn the truth about jerks, and by "truth" I mean, "their true selves revealed and their true nature made manifest," their ability to be jerks depletes. When we find out how much of a jerk a person really is, they are no longer a jerk. This is what happens with the other animals we've talked about. They've been sheltered and have been sheltered from unpleasant truths about themselves. Finally, the only way that we can have jerks is by talking about them. We have to have stories. And if we write the story in a book, we give the lesson of our society to the next generation, which is why we write these books. From this perspective, Jerk Shrinkage is just the more visible chunk of the trend. Jerk's existence is an early warning signal that we have grown up on the truth about the jerk and have now taught our children the truth about the jerk. The cat, whose other two senses (ouch! and ears!) are free, thanks to the Jerk Shrinkage, has taken in the truth that the world was a jerk before Jerk Shrinkage was big enough to be seen. The Jerk is hiding and sulking. It has withered away, and it is now just a small
